

Enterprise infrastructure engineering, with the proof running in public.

Technology leader and hands-on engineer with 15+ years modernizing enterprise infrastructure: 15,000+ VMs held at 99.999% uptime, more than \$1 million a year in documented cost recoveries, and Zero Trust security implemented at fleet scale. Founder of Planetek LLC, where the proof is public: twelve production AWS environments spanning serverless, containers, data analytics, and generative AI, every one defined in Terraform and open at demos.planetek.org. Available for managed AWS services, fractional CTO and VP Engineering engagements, and federal and state contracting.

01 SELECTED OUTCOMES

>\$70K

RECOVERED MONTHLY SPEND

OBSERVABILITY COST RECOVERY

A code change inflated Datadog indexing and ingestion across a 15,000 VM estate, spread over several management chains. Traced the change, wrote code enumerating every affected log, and drove the remediation through each chain.

90%

FEWER CRITICAL LAB FINDINGS

TWO-WAVE PATCH CYCLE DESIGN

Built a Tanium patching program in which non-critical patches ship a week ahead of critical ones, so a bad rollout surfaces on low-risk systems and never reaches a critical patch path.

\$250K

RECOVERED ANNUAL RUN RATE

DORMANT SYSTEM DECOMMISSIONING

Identified more than 1,000 systems idle for over two years and decommissioned them with their supporting infrastructure. The recovered spend is annual and recurring.

02 EXPERIENCE

FOUNDER & PRINCIPAL · Planetek LLC

2024 TO PRESENT

- ◆ Provide managed AWS delivery, fractional CTO and VP Engineering services, AI training, and web development to businesses and public sector organizations, with security posture aligned to NIST and CIS frameworks.
- ◆ Architected, built, and operate twelve production AWS demo environments plus a public hub at demos.planetek.org: serverless (Lambda, API Gateway, Step Functions, EventBridge), containers (ECS Fargate, ECR), data and analytics (Aurora Serverless v2, DynamoDB, S3 data lake with Glue and Athena), and generative AI (Bedrock RAG, model evaluation, Texttract and Comprehend document intelligence).
- ◆ Provisioned 100% of infrastructure as code with Terraform in a public GitHub monorepo; keyless CI/CD through GitHub Actions OIDC with automated Checkov and Trivy scanning on every commit.
- ◆ Implemented layered governance: CloudTrail, GuardDuty, Security Hub, AWS Config with a NIST 800-53 rev 5 conformance pack, AWS WAF, and least-privilege IAM. FinOps guardrails run the whole portfolio for under \$15 a month, with the real bill published on the DevOps environment.
- ◆ Migrated the company web presence to AWS (S3, CloudFront, Route 53, SES) with zero downtime for DNS or email.

SOFTWARE ENGINEER III · Fortune 500 telecommunications operator

15,000+ VM ESTATE

- ◆ Architected and managed multi-cloud environments across vSphere, AWS, and DigitalOcean spanning 15,000+ VMs at 99.999% uptime, using SRE practice: SLO and SLI frameworks, chaos engineering, and golden image pipelines.
- ◆ Engineered the CVE patching strategy for the estate with Tanium, holding 95% coverage of critical and important patches, and built a real-time compliance dashboard for executive visibility. Estimated 80% reduction in organizational risk exposure.
- ◆ Ran observability (Prometheus, Grafana, Datadog, Splunk, ELK) and FinOps cost analytics for the fleet; the cost recoveries above total more than \$1 million a year and came from this work.
- ◆ Built hundreds of CI/CD pipelines with GitHub Actions, GitLab CI, Jenkins, and ArgoCD, and automated VM lifecycle management with Ansible, Terraform, Packer, and Artifactory.
- ◆ Designed and enforced Zero Trust security architecture integrating CrowdStrike, Centrify/Delinea, Infoblox, and HashiCorp Vault for identity, secrets, and network access across the full fleet.

PROFESSOR, COMPUTER INFORMATION SYSTEMS · Community College of Aurora

2024 TO PRESENT

- ◆ Deliver CIS courses in person and online, including CompTIA A+ and Operating Systems, bringing industry DevOps and cloud practice into the classroom.
- ◆ Provision and manage 100+ reusable lab VMs per semester through automation.
- ◆ Collaborated with the Colorado Community College System on standardized online course materials distributed across 13 colleges statewide.

SENIOR SYSTEMS ADMINISTRATOR · AlphaGraphics Inc.

2019 TO 2022

- ◆ Led a full infrastructure migration from Salt Lake City to a Denver colocation facility in 48 hours with zero downtime, maintaining 99.999% uptime through the transition.
- ◆ Managed an offshore development team rebuilding a portfolio of 300 websites; supervised a six-person help desk and provided Tier 3 escalation support.
- ◆ Administered G Suite, Active Directory, and Office 365 globally; led security hardening through CVE remediation and Zero Trust principles.

TEST ENGINEER IV · Hewlett Packard

2013 TO 2019

- ◆ Primary tester for HP PC Hardware Diagnostics across 300+ consumer and enterprise systems; led UEFI testing that reduced defects by 90%.
- ◆ Developed a PXE boot solution for UEFI testing adopted across worldwide HP service centers; built automated test suites with Selenium and JUnit.

03 TECHNICAL SKILLS

CLOUD & INFRASTRUCTURE

AWS (EC2, S3, IAM, Lambda, VPC, EKS, RDS, CloudWatch), vSphere, Azure, DigitalOcean

CONTAINERS

Docker, Kubernetes, Helm, Podman, containerd, ECS Fargate, ECR

PROGRAMMING

Python, TypeScript, JavaScript, Bash, PowerShell, Next.js, React, REST APIs

OBSERVABILITY & SRE

Prometheus, Grafana, Datadog, Splunk, ELK, CloudWatch, SLO/SLI, chaos engineering

DATA

PostgreSQL (Aurora Serverless v2), MySQL, Redis, MongoDB, DynamoDB, Glue, Athena

IAC & AUTOMATION

Terraform, CloudFormation, Ansible, AWX, Packer, Artifactory, Jenkins

CI/CD & DEVOPS

GitHub Actions (OIDC), GitLab CI, ArgoCD, Jenkins, Checkov, Trivy, Agile/Scrum

SECURITY & COMPLIANCE

Zero Trust, CVE remediation, NIST, CIS, CrowdStrike, Tanium, HashiCorp Vault

NETWORKING

DNS, DHCP, VPN, BGP, VLAN, NSX, Infoblox, Zero Trust architecture

AI & ML

Amazon Bedrock, RAG, prompt engineering, model evaluation, Textract, Comprehend

04 EDUCATION

- ◆ M.S. Computer Information Systems, Colorado State University, 2020
- ◆ Graduate Certificate, Cybersecurity, Colorado State University, 2020
- ◆ Graduate Certificate, IT Project Management, Colorado State University, 2020
- ◆ B.S. Physics, Colorado State University, 2018
- ◆ A.S. Mathematics, Front Range Community College, 2016

05 CERTIFICATIONS

- ◆ AWS Certified Cloud Practitioner
- ◆ CompTIA Security+
- ◆ CompTIA Network+
- ◆ Microsoft Certified Professional
- ◆ Career & Technical Education Certification, State of Colorado
- ◆ Web Design & Development, Cornell University, 2024
